

RESILIENT NEIGHBORHOODS

Project Interest Form

We are striving to expand the scope and reach of our Resilient Neighborhoods Program and are currently looking for new projects in Solano County to partner with our community on. We want to know your vision for your neighborhood! No project is too big or too small for us to consider. You can print and use the neighborhood template provided as a foundation to sketch out your wildest dreams, or create your own template that represents the street where you live. Reference the Placemaking Packet from City Repair for ideas and inspiration to get started.

This work is best done as a collaborative effort among neighbors – giving you the opportunity to learn from and inspire each other with your creativity and get to know one another better through the process.

The following prompts can help to develop your vision. Use them as a guide for your discussion, or send your answers to us along with your vision image.

- Name one aspect of a community, your current or a past one, that you love.
- Name a challenging issue in your neighborhood and a creative idea or process that might help address or solve it.
- Name something that you feel is lacking in your neighborhood and a way to bring that asset or service to your community.

Send your ideas to gabriela@sustainablesolano.org. **Be sure to include your name and the town in Solano County where you live with your submission.**
