Air quality workshop set for Jan. 28 in Fairfield

Daily Republic Staff
Jan 3, 2024

FAIRFIELD — A public workshop on creating a community action plan for improving the city's air quality has been scheduled for Jan. 28.

Sustainable Solano is hosting the event, which will be held at the Fairfield Adult Recreation Center, 1200 Civic Center Drive. It is the latest in a series of round tables that have been held.

"This community-driven action plan is an important part of Sustainable Solano's air quality program in Fairfield, which includes the Youth Air Protectors program (an internship for high school students focused on air quality), public roundtables and workshops around air quality, and hands-on projects to create green spaces and more walkable communities," the organization stated.

The event, noon to 3 p.m., is free, but registration is required. Go to www.eventbrite.com/e/fairfield-air-quality-action-plan-workshop-tickets-753492876477. Lunch will be provided.

"Fairfield's walkability and bikeability, air quality concerns regarding agriculture, setting up a community air monitoring station in Fairfield, and Travis Air Force Base's impact on air quality" is part of the planning effort, Sustainable Solano stated.

"By participating in the creation of a community action plan, residents can have a voice in how important issues are addressed within their communities. Sustainable Solano previously facilitated the creation of a community-driven action plan around flood risk and resilience in Suisun City that continues to inform city decisions and future planning."
